**TODO:** to the provided project01.css, add the following styles so that the HTML doc looks like what's on the left (you can choose any font style, but choose the colors similar to the example on the left)

- Goal 1 –body (background-color & font), h1~3, p
- Goal 2 – Font, color, background-color for hyper link (default, visited, hover) to the [Central Park](#), [New York City](#) link
- Goal 3 – padding, color, list-style, margin, font for header, footer, nav
- You DO need to code the new styles for body, h1~h3, p, link/a, header, footer, hgroup, nav

# Project 1: Share Your Travel Photos

---

TODO: create reset.css file with the content being exactly same as below (to reset the browser's default style)

```
1  html, body, header, footer, hgroup, nav,  
2  article, section, figure, figcaption,  
3  h1, h2, h3, ul, li, body, div, p, img  
4  {  
5      margin: 0;  
6      padding: 0;  
7      font-size: 100%;  
8      vertical-align: baseline;  
9      border: 0;  
10 }
```

# Project 1: Share Your Travel Photos

- Goal 1 : general formatting
  - code new style for <body>, <h1>~<h3>, <p>

The screenshot shows a web page for sharing travel photos. The main header is a dark blue bar with the text "Share Your Travels" in white, followed by the subtitle "let us know where you've been" in a smaller font. Below this is a navigation bar with three links: "Description", "Related Photos", and "Reviews". The "Description" link is highlighted. Under the "Description" link, the text "Photo by Randy Connolly" is displayed. Below this is a paragraph of text: "This photo of Conservatory Pond in Central Park in New York City was taken on October 22, 2011 with a Canon EOS 30D camera." Below the text is a rectangular image of a pond. Several green boxes with yellow borders and arrows point to specific elements on the page, each containing an HTML tag: "<h1>" points to the main header, "<h2>" points to the subtitle, "<h3>" points to the "Description" link, and "<p>" points to the paragraph of text.
